Model 9210

Slide Gate Operators

9210 Series operators are designed to operate vehicular sliding gates used in Limited (Class III) and Restricted (Class IV) industrial and maximum security applications only. These operators have a full feature circuit board and are available with #50 or #60 chain. Chain support tray (p/n 2601-270) should be used on gates exceeding 20 feet in length and the heavy-duty mounting pedestal is recommended for gates weighing over 1500 Lbs.

Model 9235

Slide Gate Operators

9235 Series Variable Speed operators feature slow-start / slow-stop operation. These operators are designed to operate vehicular sliding gates used in Limited (Class III) and Restricted (Class IV) industrial and maximum security applications that have a need for a high speed gate and emergency close features. These operators have a full feature circuit board and come with #60 chain. Chain support tray (p/n 2601-270) should be used on gates exceeding 20 feet in length and the heavy-duty mounting pedestal is recommended for gates weighing over 1500 Lbs.

Model 9240

Slide Gate Operators

9240 Series Variable Speed operators feature slow-start / slow-stop operation. These operators are designed to operate vehicular sliding gates used in Limited (Class III) and Restricted (Class IV) industrial, maximum security and corrections applications. These operators use a heavy-duty 10 gauge steel cabinet, have a full feature circuit board and come with #80 chain. The heavy-duty mounting pedestal is standard with this operator. Chain support tray (p/n 2601-270) should be used on gates exceeding 20 feet in length.

Model 9530

Slide Gate Operators

9530 Series Variable Speed operators feature slow-start / slow-stop operation. These operators are designed to operate very large and very heavy vehicular sliding gates used in Limited (Class III) and Restricted (Class IV) industrial and maximum security applications. These operators have a full feature circuit board and come with #80 chain. Chain support tray (p/n 2601-270) should be used on gates exceeding 20 feet in length.

Operators

- 9530-080 3 HP, 208V 3^Ø 12,000.00

Model 9550

Slide Gate Operators

9550 Series Variable Speed operators feature slow-start / slow-stop operation. These operators are designed to operate very large and very heavy vehicular sliding gates (up to 20,000 Lbs) used in Limited (Class III) and Restricted (Class IV) industrial and maximum security applications. These operators have a full feature circuit board and come with #100 chain. Chain support tray (p/n 2601-270) should be used on gates exceeding 20 feet in length.
